

QUARK

ENVIRONMENTAL POLICY

ENVIRONMENTAL POLICY

QUARK's basic objective is the reduction of environmental impacts and the full satisfaction of our clients.

Environmental protection and the sustainable use of resources, avoiding environmental damage that may arise from our activities and processes, applying preventive measures when necessary.

To this end, it defines and participates in the environmental policy and pursues the achievement of the following general objectives:

To protect the environment and prevent pollution through

- Protecting the environment, avoiding damage that may be caused by our day-to-day activities and processes.
- Efficient use of natural and energy resources, such as water and electricity.
- Optimising resources and minimising the waste generated.
- The correct management of the waste generated, both hazardous and non-hazardous.
- Creating environmental objectives and indicators adapted to our activities to improve environmental performance.
- Involving the entire organisation and interested parties in raising awareness of their responsibilities towards the environment.
- Seeking continuous process improvement.
- Reducing our carbon footprint.

Obtain an appropriate environmental management system to

- Adapt it to QUARK's purpose, size and context.
- The involvement of stakeholders interacting with the organisation within the scope of our system.
- The risks and opportunities associated with the activity, processes and services within our scope.
- Ensuring compliance with environmental legislation and our own legal requirements.

This commitment will be fulfilled by

- Our management will provide the necessary resources to achieve the proposed objectives and facilitate training and information on environmental matters in order to reduce potential environmental risks and impacts that may arise.
- Our commitment to comply with environmental legal requirements, as well as our own legal requirements necessary for the correct functioning of the organisation.
- We will create environmental targets and indicators to achieve continuous improvement and environmental performance.

- We will make our environmental policy and our environmental commitment and performance available to all our employees, as well as to customers, suppliers, collaborators and other interested parties of the organisation.
- We will promote the training and awareness of all employees to reduce the environmental impacts associated with our daily activities, making responsible use of the resources we use and the waste we generate.
- Promoting the integration of good environmental practices in the activities and decision making of the different areas of the company, involving the interested parties.
- We will ensure that environmental performance information is communicated, transparent, updated and adapted to the needs and expectations of our stakeholders.
- We are convinced that this effort will positively influence QUARK and encourage the development of a culture that favours sustainable growth.

***LOYAL** to these principles, the precepts to be complied with by QUARK are set out in our Environmental Policy, which is declared to be of obligatory compliance.*
